Astt. Prof. Education Dept. Hindu College Moradabad

### ABSTRACT

*Education is is very important for an individual's success of life. Education provides pupils teaching skills that prepare them physically, mentally and socially for the world of work in later life. Education is generally seen as the foundation of society which brings economic wealth, social prosperity and political stability.*

*Men and women complement each other. If men were supposed to handle stuff then women were more responsible for internal affairs. The only difference in this notion is, today women are equally competent behind the veils and outside world. They are more confident and one can find them in every possible sphere of human's life. No male bastion is untouched by females and that's a wonderful sign of strides made by woman.*

*Women's education in India plays a very important role in the overall development of the country. It not helps in the development of half of the human resource, but in improving the quality of life at home and outside. Educated women not only tend to promote education of their girl children, but also can provide better guidance to all their children. Moreover educated women can also help in the reduction of infant mortality rate and growth of the population.*
